

MEASUREMENT GUIDE FOR TAILORED DOG COAT/SWEATER

NOTE: not all these measurements are required for waterproof coats or for ready to wear range- this is a comprehensive measurement guide for my bespoke range to ensure the coat or sweater is a good fit.

PET/

OWNER NAME & CONTACT DETAILS _____

A _____ High neck (narrowest part usually just behind the ears)

B _____ Low neck (widest part of neck at base)

C _____ Chest (deepest circumference of chest)

D _____ Waist (circumference just after last ribs before tummy)

E _____ Upper thigh to upper thigh (approx mid point between knee & hip)

F _____ Back length (base of neck to base of tail)

G _____ Neck length (measurement between (A)-High & (B)-low neck)

H _____ Low neck to last ribs (base neck (B) between front legs to last ribs approx measurement (D) placement)

I _____ Low neck to shoulder blade (diagonal measurement from low neck (B) to shoulder blade - either leg)

J _____ Chest width (shoulder blade to shoulder blade- front facing)

K _____ Between front legs (measurement over ribs between the front legs)

If your dog is a breed with a wider head than neck, please include this measurement to ensure an easy fit over the head. Measure the widest part of the skull, usually at temples just in front of ears & just behind jaw.

-----x-----

* Measurements required for sweaters- All measurements (A through to K)

* Measurements required for bespoke waterproof coats - B-C-D-E-F-G-H-J-K
